

Making Sense of Maths

New DVD Release

Finally the long awaited DVD (Vol. 1) is ready for sale. "Making Sense of Maths by Jan Cavanagh" is designed to demonstrate appropriate ways of working with materials to Make Sense of Maths.

Many teachers have asked for a recording of some of the activities that Jan uses in her workshops.

See examples of how to use practical materials in schools.
Total time is approx 45 minutes.

The DVD contents sequences with the following topics:

Beads: Addition and Multiplication.

Primes and Composites: Using multilink blocks.

Pattern Blocks: Showing Fractions; Area, Perimeter, Angles, Symmetry and Enlargement.

Montessori Numbers: Demonstrating place value.

Magic Gadget: An engaging way to show input and output.

Mental Computation: Using a counter on a number chart.

Sunflowers: A game for counting on and mental computation strategies.

Money OHTs: An area model of representing money.

Telling the time: Using clock beads to demonstrate times on an analogue clock

Mathematical Balance: Modelling equations and number facts.
